DETAILED ACTION

1. The non-final rejection as set forth in paper filed on 07/25/2003 is withdrawn in response to applicants' amendments.
2. Claims 39-72 are pending in the application.

Allowable Subject Matter

3. Claims 39-72 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record, Prince to U.S. 5,431,775 teaches in Figs.1A-J and related text a method of forming optical guides through a silicon substrate including forming a first and second functional circuit on a first surface of a semiconductor substrate (5) (column 2, lines 39 – 56), the second surface of the semiconductor surface being opposite the first surface; forming a hole (60) through the semiconductor substrate (5); forming an optical fiber having a silicon oxide cladding layer (30) having a first index of refraction and a core (80) having a second index of refraction greater than the first index of refraction in the hole (60), wherein the cladding layer (30) surrounds the core (80); and interconnecting the first and the second functional circuits together via the optical fiber (80) (column 2, line 7 – column 4, line 59).

However, Prince neither teaches nor suggests forming the hole comprising forming an etch pit at a selected location of the first surface of the semiconductor substrate, and performing an anode etch of the first semiconductor substrate to form the hole at the location of the etch pit; forming the optical fiber with a hole running

substantially along the center of the optical fiber; and lining the hole with a reflecting mirror prior to forming the cladding layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
